Vinquiry Calibration Services

In order to ensure accurate analysis, it is essential that all laboratory instruments are working properly. To help make sure your instruments are calibrated correctly, Vinquiry is offering Calibration Service Days on June 28th and July 26th. Regularly calibrated equipment and accurate analytical results mean less time and resources spent reanalyzing samples. Vinquiry's Calibration Services can also serve as troubleshooting for your instruments. Troubleshooting can determine major problems where repair or replacement parts are needed.

The following is a list of equipment and instruments that we will accept for calibration:

- ▶ Single-Channel Automatic Pipettors
- ▶ Multi-Channel Automatic Pipettors
- ▶ One-Channel pH Meters
- ▶ Two-Channel pH Meters
- ▶ Refractometers
- ▶ Digital Refractometers
- ▶ Portable Digital Balances
- ▶ Mechanical Balances
- ▶ Microscopes
- ▶ Spectrophotometers

Please call 707-838-6312 or click on the link for the [Calibration Work Order Form](#) and pricing. All instruments must be sent with a work order form and separate forms are required for each instrument. In order for us to prepare for Calibration Days, please let us know in advance what instruments you are sending in. If it is determined that repair is needed for your instrument, service may require more time outside of the Calibration Day.

Repair Services

Special arrangements may also be made for maintenance and repair of laboratory equipment and instruments. These services are priced on a per project basis. Various service levels are available and custom services can be created to fit the needs of your equipment. Please call 707-838-6312 to schedule your equipment maintenance.
