10% off the Complete Free SO₂ Aeration-Oxidation Apparatus with Accuflow 5000

Aeration-Oxidation (AO) is an accurate and relatively simple way of testing for SO₂. Free SO₂ is removed from a juice or wine sample by passing a stream of air through the acidified sample. The released SO₂ passes through a neutral hydrogen peroxide (H₂O₂) solution, where the reaction between H₂O₂ and SO₂ takes place. Sulfuric acid is formed and titrated with standardized sodium hydroxide. The Accuflow 5000 serves as vacuum pump, timer, and flowmeter for the AO set-up.

<i>Free SO₂ AO Apparatus with Accuflow 5000*</i>	<i>Sale Price</i>	<i>Item Number</i>
--	--------------------------	---------------------------

Includes glassware, clamps, stand, tubing, and AccuFlow 5000.	\$544.50	50-112-5000

*Quantities limited to stock on hand. Reagents, pipettes, and titration equipment must be purchased separately. All items are sold "as is."
