

Harvest Lab Bootcamp

This 3-hour workshop will include a presentation on the background of harvest chemical analysis and a round-robin style training session. After the short presentation on chemical testing in juice and wine, Enartis Vinqury lab analysts will train you on Brix (method by Refractometer and Hydrometer), Free SO₂ (method by Ripper and Aeration-Oxidation), Total SO₂ (method by Ripper), pH, and Titratable Acidity. Participants will learn the standard operating procedure of each analysis and will have the opportunity for hands-on practice after a demonstration. Each person will receive individual attention and be taught proper analytical techniques, troubleshooting ideas, and maintenance of each apparatus.

Reserve your space now!
