

VINQUIRY

Make sure your instruments are accurate. Send them to Vinquiry's Calibration Day!

In order to ensure accurate analysis, it is essential that all laboratory instruments are working properly. To assist you in this endeavor, Vinquiry is offering Calibration Service Days. Just send us your pH meters, refractometers, balances, and automatic pipettors to have service completed on April 26th, June 28th, or July 26th.

Various service levels are available and custom services can be created to fit the needs of your equipment. Calibration is available for both one and two channel pH meters. Basic service levels for pipettors include verification and validation at multiple volumes, adjustment of the instrument into tolerance, and leak checks. Both single channel and multi-channel pipettes are accepted.

Instrument repair is also available and priced on a per project basis.

Please call 707-838-6312 or visit the Services page at www.vinquiry.com for the Calibration Work Order form and pricing. All instruments must be sent with a work order form and separate forms are required for each instrument.
