

## TCA Threshold Testing

Determine your sensory threshold of TCA (2,4,6-Trichloroanisole) at Vinquiry's sensory laboratory in Napa, CA. During each 30 minute testing session, participants will be evaluated individually for their lowest level sensory threshold of TCA. Each person will perform a series of triangle tests using wine containing 1-10 parts per trillion TCA. If the participant's threshold is determined to be in this range, they will receive a certificate specifying their sensory threshold level. Quantifying TCA levels is important to identify individuals that are able to recognize the defect. Individuals that have a low sensitivity threshold can be used for cork screening programs, TCA identification in the winery, or identifying corked wines in the tasting room.

Testing must be done in an odor free environment, therefore please do not wear perfume or any other strong odors. The test will take approximately 30 minutes.

**Reserve your space now!**

There are a limited number of test times available. Please call (707) 838-6312 or fax this form back to (707) 838-1765 to set-up a test time.
